

Monoseal[®] for Industrial

Safe and Dependable Product Protection for Wide-Ranging Chemical and Agrochemical applications

Keep industrial products safely contained from your plant, to store shelves, to consumers' homes with Monoseal liners from TekniPlex. These one-piece induction heat seals provide critical product protection for a wide range of industrial products such as cleaning supplies, agrochemical, and automotive solutions. Engineered to deliver a robust seal, Monoseal liners safeguard against leaks and spills— even for containers with harsh or corrosive contents.

Features and Benefits:

- Strong induction seal prevents leaks and protects product integrity
- Vented liner options available
- Compatible with multiple container types including PP, PE, PET, and Glass
- Available both on-reel and as punched parts
- Fast lead times and responsive customer support
- European-based production, backed by global materials science expertise

Monoseal is also available as a vented liner option to regulate air pressure in packages containing volatile products.

Vented liners enable free air exchange through the liner without compromising the seal to prevent bloating, paneling, and leaks.
