

# Peel n Pour™ Dispensing Liners

Specially designed to control product flow while preventing leaks

For items like baby oil and other low surface tension products, controlling the speed of dispensing is critical. TekniPlex's Peel n Pour™ dispensing liners take the burden of dosage control off consumers through a convenient peel-tab design.

Peel n Pour™ is a revolutionary alternative to standard plastic press-in orifice reducers. Its strong induction seal prevents leaks, while the fully customizable peel-tab reveals a smaller opening to reduce the flow of product. Eliminating the need for plastic orifice reducers also enables companies to simplify sourcing demands and reduce production costs.

## Features and Benefits:

- Ideal for beauty, personal care, household, and pharmaceutical applications
- Strong induction seal prevents leaks
- Sealing capabilities for all bottle types, including HDPE, PP, PET, and glass containers
- Fully customizable liners and peel-tabs
- Printed liners are available for enhanced brand aesthetics

## Consumer Convenience

Instead of removing the entire liner, consumers can peel away a small tab on top to easily control how much product is dispensed.
