

PET Trays

Processor-grade recyclable trays

TEKNIplex

Consumer Products

TekniPlex's new recyclable PET processor tray line offers exceptional clarity for premium product display. Designed to survive the rigors of the case ready environment, our new PET trays are shatter resistant and protect against overwrap film tearing utilizing proprietary rim technology.

Overview

Why switch to TekniPlex's PET processor trays?

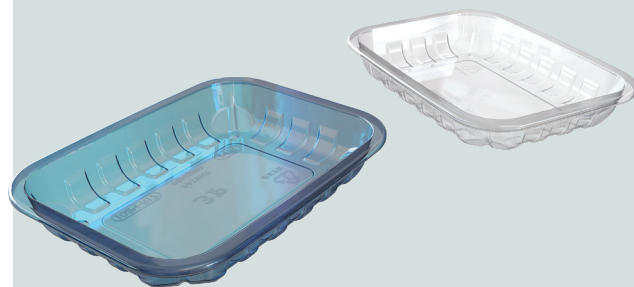

Premium product display and protection. PET trays offer exceptional clarity and are an ideal showcase for your premium products. The shelf appeal is complemented by high-value performance. TekniPlex's process results in a tray that is highly durable and shatter resistant which makes it ideal for cold chain distribution.

Proprietary rim technology. TekniPlex offers two unique, proprietary rim options to address various film overwrapping materials and processes. The blunt tray flange minimizes the chance of overwrap film tears. Displacement of the cut edge is critical to product integrity through the supply chain.

Drop-in replacement for PS trays. TekniPlex's PET processor trays serve as a drop-in alternative in areas where PS foam legislative bans exist. No additional equipment capital investment is required. Easy line changeover from one tray type to another – even when switching between PS foam and PET on the same packing line.

Absorbent pads. TekniPlex can also provide pre-padded trays for added convenience at the packing line.

Family Look. Three popular tray sizes are now available which feature the same 8.5- x 6.52-inch footprint, but different depths: 3S (Shallow, .82 inches), 3P (Standard, 1.34-inches), 3D (Deep, 1.7-inches).

Specifications

CODE	SIZE
3S	8.50 x 6.52 x 0.82
3P	8.50 x 6.52 x 1.34
3D	8.50 x 6.52 x 1.70
8P	10.50 x 8.50 x 1.34
15P	14.75 x 8.00 x 1.5

Other sizes and colors upon request
