

# Latex-free cold seal

Rollstock that delivers fiber-free, light peel

TekniPlex has developed a range of latex-free, cold-seal options and printing capabilities to meet your demanding performance requirements.

## OVERVIEW

With more than 20 years of cold-seal experience, TekniPlex has the technical knowledge to provide you with solutions that will meet your specific product performance objectives. With printing being a critical component of cold-seal applications, you can rest assured that TekniPlex uses the latest technology to deliver precise imprints of your critical product information.

Here are just a few ways TekniPlex's expertise can meet your performance objectives:

- **Synthetic (latex-free) cold-seal options** to mitigate allergic reactions to natural latex.
- **Ideal for high-speed** applications.
- **Cold-seal coatings seal to themselves** for a smooth fiber-free light peel.
- **Multiple manufacturing facilities** to address redundancy requirements.
- **Printing capabilities** include quick changeovers for short runs (10-color high-quality printing press).
- **Superb printing** of small font and tight repeats.
- **Inventory management capabilities** to help production objectives.

### Applications

- Traditional wound care such as adhesive bandages and dressings
- Nasal strips
- Swab sticks
- Devices sterilized by EtO and radiation

### Product offerings

- 2.6 mil HDPE / 1.7 lb latex-free coating
- 42 lb paper / 2 lb latex-free coating
- 22 lb paper / 1.6 lb latex-free coating
