

Printing capabilities

High-quality printed rollstock and die-cut lids

TekniPlex's significant printing expertise means that your product will always feature precise and legible information.

OVERVIEW

Every pharmaceutical and medical application requires that its branding and use information be printed in a precise manner so that its therapeutic objectives are not compromised. TekniPlex's three-plus decades of printing expertise means that your rollstock and lids will feature precise and legible information even with reduced type.

Here are just a few ways TekniPlex's printing expertise can meet your performance objectives:

- Up to 10-color printing
- We print via flexographic and gravure processes
- Experts in short repeats, tight tolerances
- Ability to print detail-rich marketing graphics
- In-house prepress options
- 30-plus years printing experience
- Quality printing on challenging medical grade substrates
- Stocking programs for printed and/or base materials

We print on the following materials:

- Medical grade DuPont™ Tyvek®
- Medical grade paper
- PET
- Nylon
- OPP
- Foil
