

Bellow bottle

Bellow bottle's vertical construction enables evacuation of entire product content

OVERVIEW

- **Available in two capacities: 3 ml or 9 ml.**

- **Injection molded cannula ensures no burrs, flashes or sharp edges for safer dispensing.** Included safety feature: once assembled, the cannula cannot be easily disassembled by the user.

- **Tamper-evident cannula cap** enhances product safety and eliminate the need for secondary packaging.

- **Bellow bottle can be customized** with silk-screening on cannula, labels or made with colored plastic.

- **Pre-assembled cannula** simplifies filling process and product handling.

- **Robust bellow design and materials** means it is durable and returns to its original shape after each use.

- **Vertical bellow bottle design** allows for dispensing of the entire product contents with minimal strength expended by the user.

- **Our material science expertise** helps support our customers in selecting the right plastic materials that are suitable for the application and regulatory requirements.
